

Dummy PDF file

A Simple PDF File

This is a small demonstration .pdf file -

just for use in the Virtual Mechanics tutorials. More text. And more text. And more text. And more text. And more text.

And more text. And more text. And more text. And more text. And more text. And more text. Boring, zzzzz. And more text. And more text. And more text. And more text. And more text. And more text. And more text.

And more text. And more text. And more text. And more text. And more
text. And more text. And more text. Even more. Continued on page 2 ...

Simple PDF File 2

...continued from page 1. Yet more text. And more text. And more text.
And more text. And more text. And more text. And more text. And more
text. Oh, how boring typing this stuff. But not as boring as watching
paint dry. And more text. And more text. And more text. And more text.
Boring. More, a little more text. The end, and just as well.

Intune for Android first Steps

Thanks to Microsoft Intune you have the possibility to securely access your Office 365 apps using mobile device.

You will get access to MS apps like Outlook, Word, Whiteboard, Edge, Planner, Stream, Excel, PowerPoint, Teams, OneDrive for Business, OneNote, To-Do and Yammer.

Besides that it also provides access to company wi-fi and Intranet resources.

Please make sure to read the Terms and conditions during enrollment of device into Intune.

[What information can my organization see when I enroll my device?](#)

Important Notes:

The users are fully responsible for the device backup. HeidelbergCement IT will not support any backup mechanism for enrolled devices except company MS cloud data.

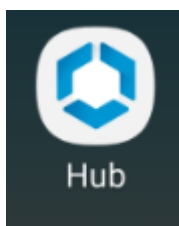

1. Prerequisites.....	2
2. AirWatch unenrollment.....	2
3. Intune enrollment.....	2

1. Prerequisites

- MFA (multi factor authentication) is configured, please check following URL: <https://teamnet.grouphc.net/dwphub/Pages/MFA.aspx>
- Device has Android at least version 7.x and greater (Reccomended OS is Android 8.x and greater)
- Device is unenrolled from AirWatch, please see next chapter in this guide
- Network connection is available (HC network can't be used during enrollment)
- In case of using private keys in MS authenticator app , please back it up before AirWatch unenrollment.
- Using customer launcher in Android like Google Now Launcher, Microsoft launcher is not supported.
- If you are using Mobile application that connect to Intranet server using VMWare tunnel (examples are Sap Fiory, Arvensis, AOM, Tableau) please consult your migration to Intune with Application Owner, because currently this functionality is not supported in Intune!!!
- Please be aware that only limited Intranet site is so far available in Intune.

2. AirWatch unenrollment

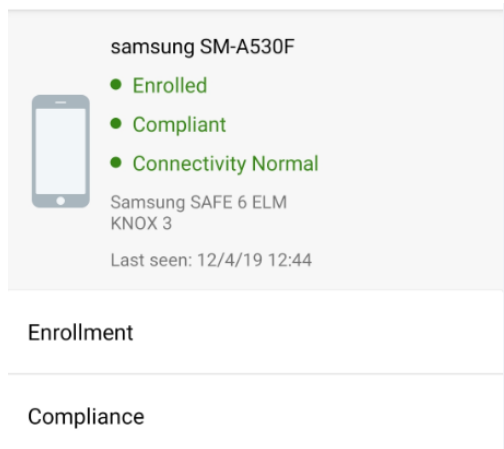

- If your mobile device is enrolled into AirWatch please unenroll it using steps below, otherwise skip that part and go to [Intune enrollment section](#). Please note that unenrollment from AirWatch will remove all apps and profiles associated with AirWatch MDM including MS Authenticator app, you have to resetup your MFA access than, to do this go to <http://mfa/> ! If you have your private tokens inside of MS Authenticator please back them up.
- Launch AirWatch Hub application

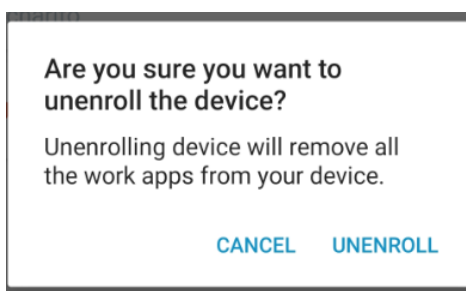

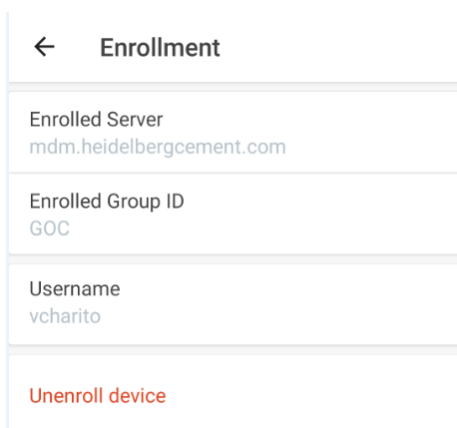

- Select This Device

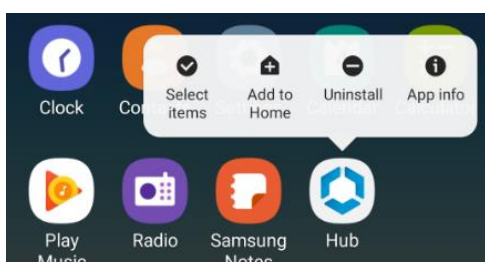

- Choose enrollment

- Select Unenroll device and confirm it on the next screen

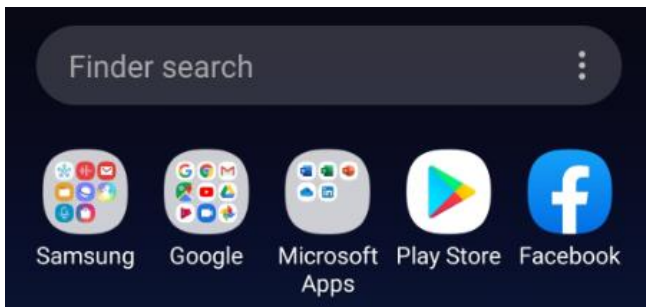

- Feel free to uninstall Hub from device.

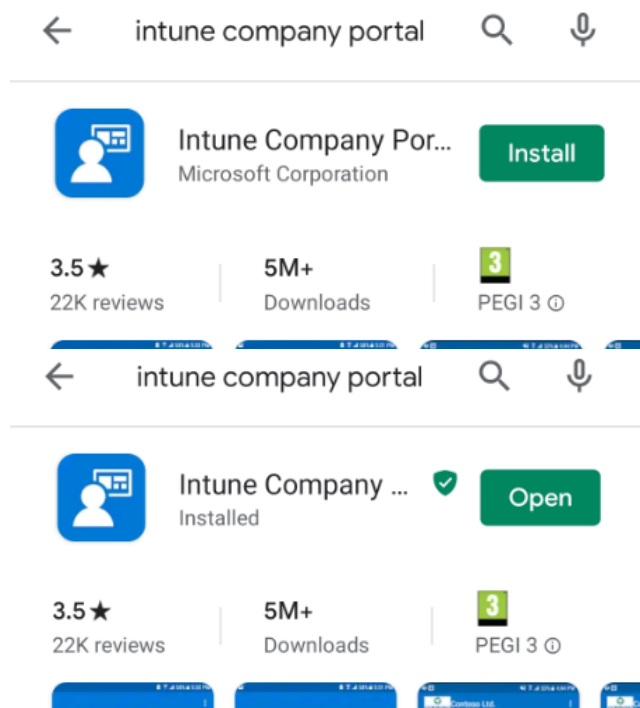

3. Intune enrollment

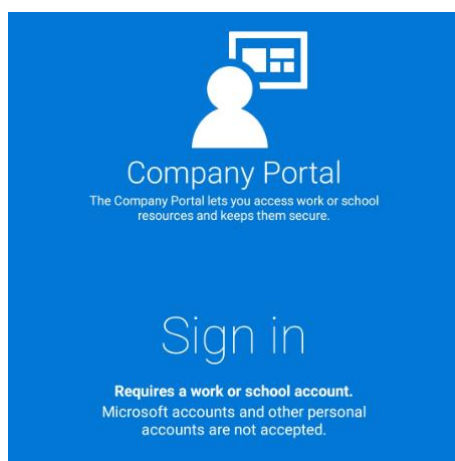

- Open Google play store on device

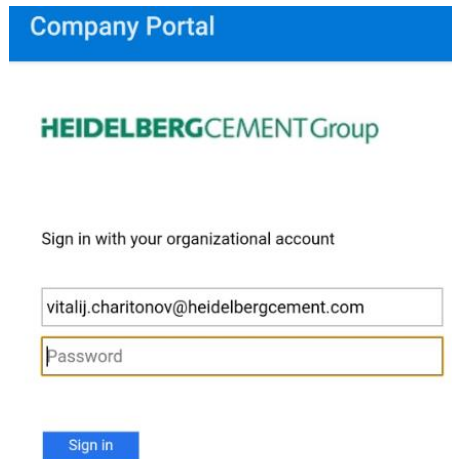

- Download and open Intune Company Portal

- Press on Sign In

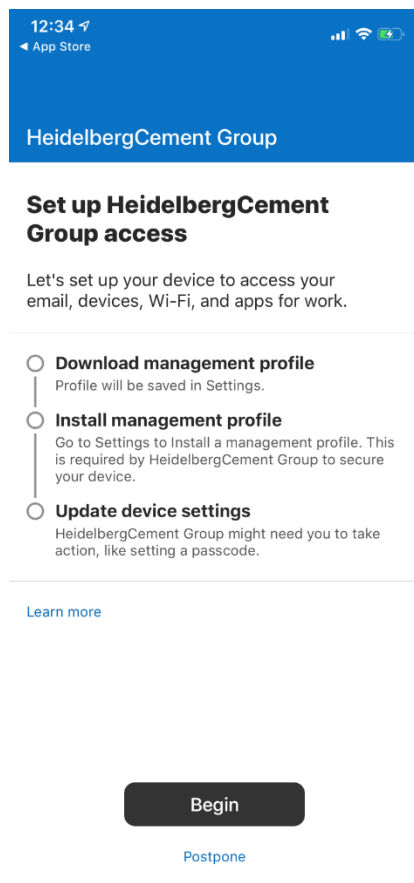

- Login using your HeidelbergCement email and password and press Sign In

You might also need Multi Factor authorization if your account is MFA enabled.

- Click on Begin

- Review what can be seen or can't on your device and press Continue

HeidelbergCement cares about your privacy.

While setting up your device, you will see some Android system screens requesting permissions to help your company secure your device.

⊘ HeidelbergCement can never see:

- Call and Web history
- Location
- Email and text messages
- Contacts
- Passwords
- Calendar
- Camera roll
- Personal apps

👤 HeidelbergCement may see:

- Model
- Serial number
- Operating system
- Work apps
- Owner
- Device name
- Manufacturer
- Phone number for corporate devices

CONTINUE

- Press Next

HeidelbergCement

What's next?

1. **Accept** Samsung's terms and conditions

If you have a Samsung device, you may have an additional privacy policy to accept.

2. **OK** work profile permissions

Your Android device needs this permission to allow your company to manage the work profile on your device.

3. **Encrypt** your device

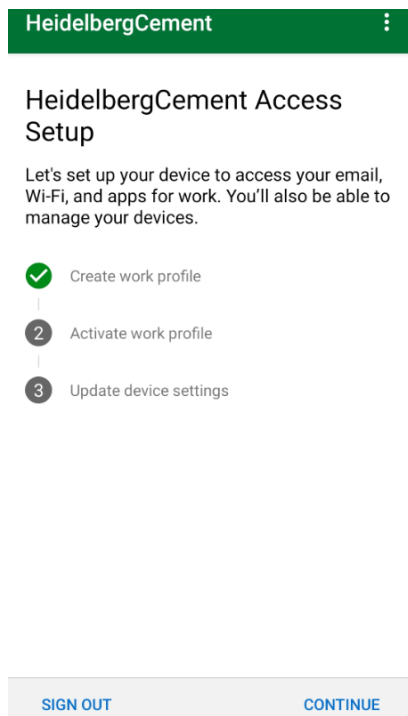

You need to encrypt your device before work profile can be set up.

[Learn more about permissions](#)

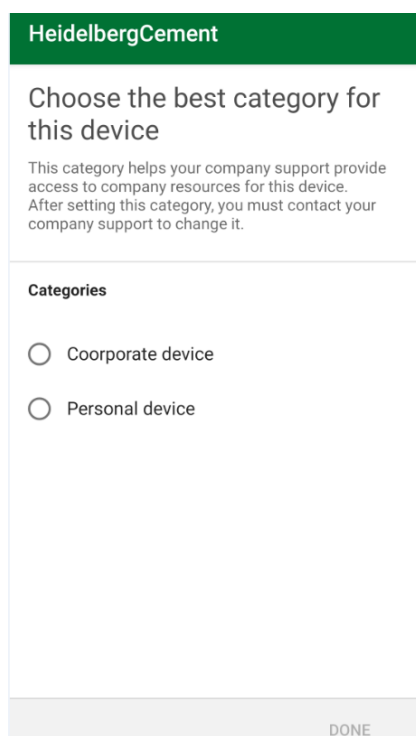

NEXT

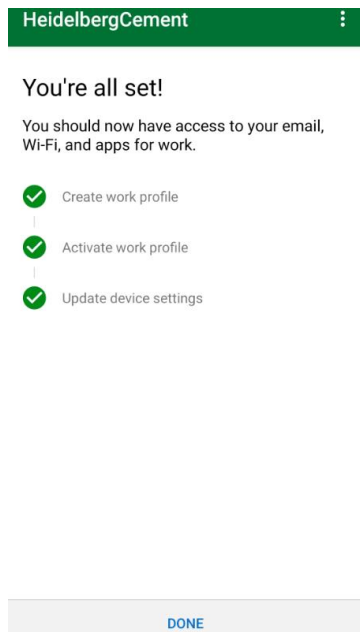

- If your device is not encrypted by default, Android OS version is less and equal than 7, you will be asked to encrypt device.
- Click on Continue

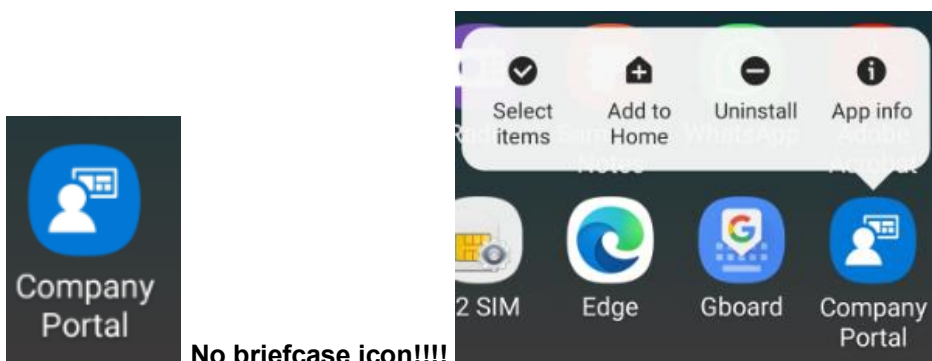

- Choose correct category for your device: Personal or Corporate and press Done

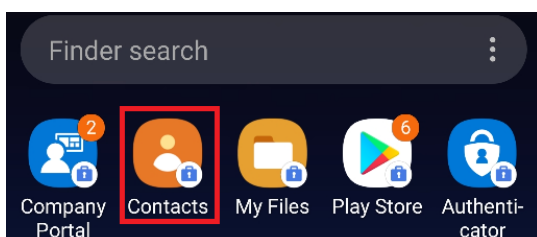

- Click on Done again

- It is highly recommended to uninstall not-managed (without briefcase icon) company portal application after enrollment if it is still appears on device.

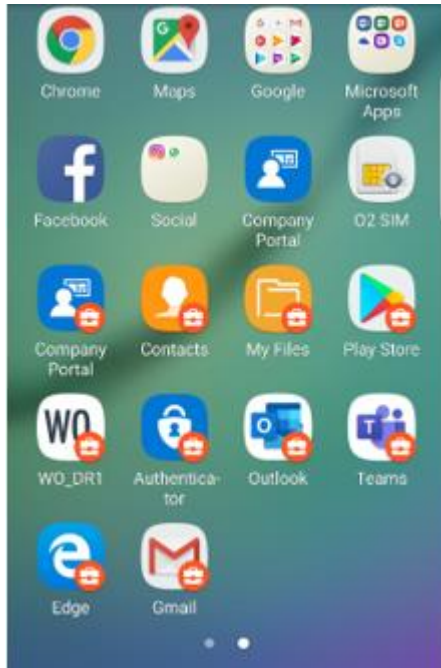

- Enrollment is ready, now Intune will push set of applications on your device:
 1. Outlook
 2. Teams
 3. Authenticator
 4. Edge
- You will find all your company related applications in Workplace. The way how you can see it depends on Android version and device manufacturer. Common is that all work related items will have briefcase icons.

- Android 7

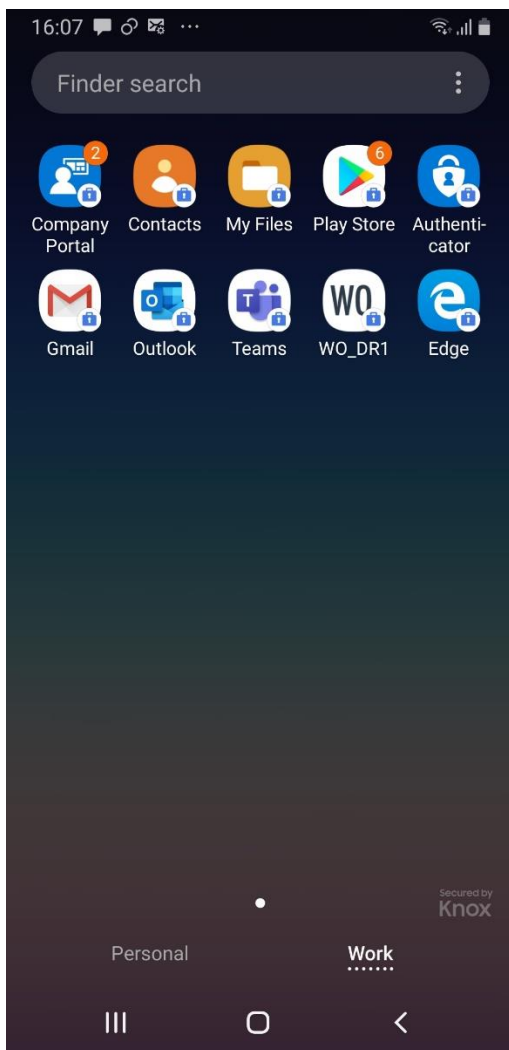

All apps are pushed to same place like your private apps

- Android 8, the folder "Workspace" will be created, where you can find company apps

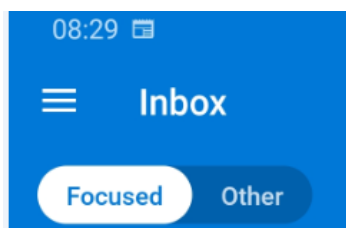

- Android 9, you will see separate space on device called Work

4. Outlook and contacts

- Your first connection in outlook with MS Cloud will be put to quarantine. Please be patient and wait for 1 hour till you will be able to see your mails.
- For corporate contacts access please use managed Contacts application inside of Work section. You may need to allow Outlook access to Contacts app via notification bar on your device.
- If contacts are not there you may need to enable contacts sync manually in Outlook, please open settings

Click on gear icon

- Tap on your account

Accounts

Vitalij.Charitonov@heidelbergcement

Office 365

- Enable contacts sync

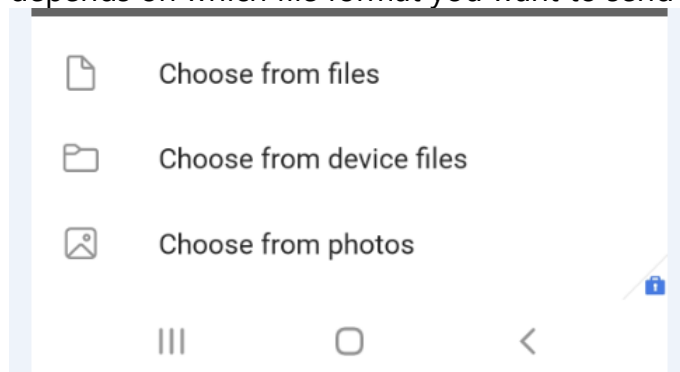

Automatic replies
Off

Sync contacts

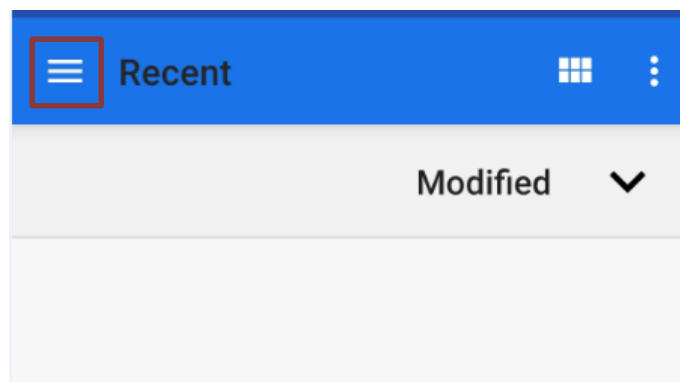

5. Outlook how to send attachments

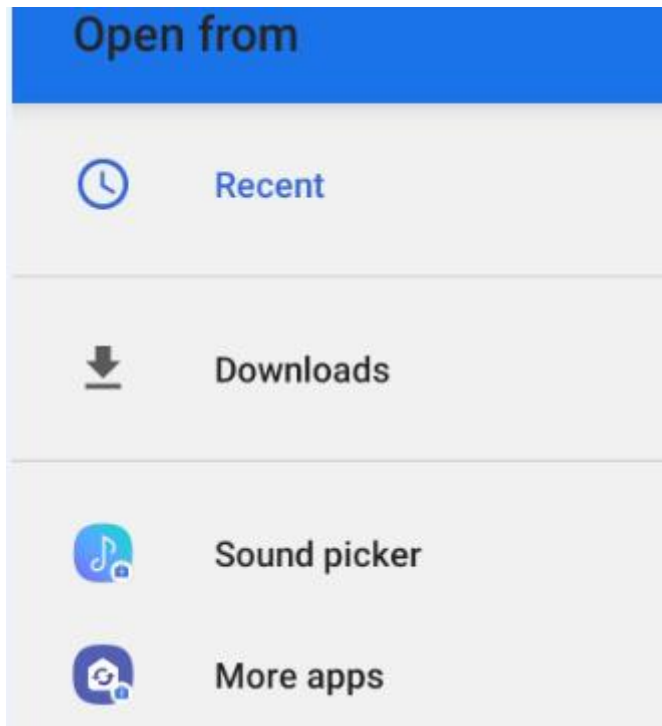

- Click on attachment icon in new mail , then choose from device files or photos, depends on which file format you want to send

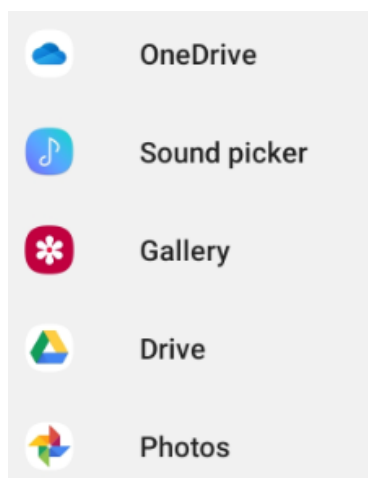

Click on settings

- Choose **More apps**

- Here you will have access to Gallery or Photos on device

- If storage of device needs to be accessed or SD card you can do enable it in settings
